CIS 4250 – Software Design V
Instructor: Prof. S. Scott
Individual Accountability Report (IAR) Template

Note. Refer to the Project Manual for detailed instructions for IAR submissions.

Individual Accountability Report (IAR) Template
The following questions MUST be included and answered completely for each submitted IAR.

IAR must be submitted one of the following file formats: text or PDF.

Q1. Student Name: Corey Martin

Q2. Student ID: 1158729

Q3. Associated Team Deliverable: Sprint 2

Q4. Team #: 4

Q5. What were the main technical or methodological knowledge, skills and/or abilities (KSAs) that were required to complete this team deliverable? What prior courses or experiences (e.g. co-op, group project, etc.) from your Software Engineering degree did you draw on for these KSAs? (bulleted list is preferred):

GUI Design
Typescript
React

Q6. What was your existing level of experience with these topics/skills before your team began working on this deliverable? (1-2 sentences):

I have already gained some experience in these skills during the first sprint. I had a medium level of experience in React and Typescript

Q7. Comment on your individual KSAs learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics / tasks in the future?
I learned more about typescript interfaces and creating more complex react components. In the future I may need to learn more in order to create similar things without a starting point of an existing project

Q8. What specific contributions did you make to this team deliverable? This should include technical or project management contributions.
My Specific contribution was designing and creating the glossary page

Q9. With whom did you collaborate for any of the above contributions (be specific – saying "all team members" is not sufficient. State which parts you worked on with whom)?
I mostly worked alone on the glossary page

Q10. Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable).
I could have managed my time better during this sprint. I mostly ended up completing my code during the very end of the sprint.
